

Screening Assessment for COVID-19

To ensure a safe and secure environment for the vulnerable populations we care for, staff, visitor, and individual screening must occur at your designated program and prior to the start of every shift.

PART A: DO YOU HAVE ANY OF THE FOLLOWING SYMPTOMS?	
Generalized Symptoms	• Fever or chills
	• Cough (new or worsening)
	• Shortness of breath (new or worsening)
	• Pneumonia
	• Upper respiratory tract infection (e.g. rhinorrhea, sore throat)
Mild Respiratory and/or Gastrointestinal Symptoms	• Sore throat painful swallowing
	• Mild to moderate shortness of breath
	• Stuffy or runny nose
	• Loss of sense of smell
	• Headache, muscle aches, fatigue or loss of appetite
	• Gastrointestinal symptoms: nausea, vomiting, and/or diarrhea

- If you answer **YES** to any of the above questions in Part A prior to your shift, **DO NOT** come to work, **inform your manager or designate immediately.**
- If your symptoms are mild and consistent with seasonal allergy, **discuss with your manager or designate.**
- If you develop any symptoms at work, **inform your manager or designate immediately.**

If you answer **NO** to all of the above questions; complete Part B.

PART B: DO ANY OF THE FOLLOWING APPLY TO YOU?
• Have you travelled outside of Canada within the last 14 days?
• Have you been instructed in the last 14 days to self-isolate?
• Did you provide care or have close contact with a person with COVID-19 (<i>probable or confirmed</i>)?
• Has anyone in your household been sick in the past 14 days?
• Have you been tested for COVID-19 and results are pending?
• Do you work in any other setting where cases of COVID-19 have been diagnosed or an outbreak declared (e.g. meat processing plant, other setting)?

If you answer **YES** to any of the above questions in Part B, **contact your manager or designate.**

- At the discretion of your manager, you may return to work if decided you are well enough to work.
- You may be asked to complete COVID-19 testing.
- You may be required to self-isolate for a period, and/or make a plan for keeping healthy at home.

If you replied **NO** to these questions, you still need to be diligent with practicing safeguards including:

1. Keeping your distance, leave 2 meters between yourself and others.
2. Washing your hands with soap frequently for at least 20 seconds.
3. Coughing or sneezing into the crook of your arms or tissue and then safety discarding it and,
4. Increasing our cleaning regime.
5. Wearing a mask when unable to physically distance or as required.
